Introduction to SQL, DataCamp
Feb 2020 - March 2020

Introduction to Cybersecurity Tools & Cyber Attacks, IBM
Jan 2020 - March 2020

Object Oriented Programming in Java, Microsoft - DEV277x
Jul 2019 - Nov 2019

Cybersecurity Fundamentals, RITx
Aug 2019 - Oct 2019

PROJECTS

- **Inventory Management System | Website**
 - An inventory management system is a website that allows user to manage and maintain his/her inventory with ease and track goods across your business's supply chain. The website has been developed to allow users to add an inventory, delete an inventory, enter inventory quantity and other details, update inventory status and more. It allows various users to view and manage various inventories added in the system.
 - It showcases the proper use of HTML 5, CSS 3 and PHP 7.

TOOLS

- Visual Studio
- IntelliJ | Eclipse
- Git
- GitHub | GitKraken
- VS Code | Atom
- Fleep | Slack
- Office Applications

OS

- Windows OS
- Linux Distributions

HOBBIES

- Video Games,
- Reading,
- Competitive Coding,
- Software & Hardware Troubleshooting

PROJECTS

• Coffee Shop System | Desktop Application

- Coffee Shop System is based on a concept to maintain customer's record , calculate the coffee cost , print the customer's bill and maintain day to day transactions in computer. Talking about the system, a user can order coffee from the main menu by selecting the Coffee Drinks. Each of the selected items contains a different price. Another feature is that the user can save customer's detail and send it to the customer's email address through SMTP. Each customer's unique bill can be verified through the QR Code which is provided in the bill.
- It showcases the proper use of **C# and WinForms**.

• Bank System | Desktop Application

- -----Under Development-----
- It showcases the proper use of **C# , XAML and WPF (Windows Presentation Foundation)**.

• Google Authentication | Java Console Application

- -----Under Development-----
- It showcases the proper use of **JAVA 8**
